Generally speaking, Algebra 2 is a 10th or 11th grade course because students usually take Geometry first. Is Algebra 2 or Geometry harder? Whether Algebra 2 or Geometry is the harder class depends entirely on the student. For example, Geometry and its shapes might be easier for you than Algebra 2 and its equations.

Homework Guidelines: English teachers tell their students explicitly how to format their papers: what fonts, what page margins, what style guides, etc. Math teachers, on the other hand, frequently just complain amongst themselves in the faculty lounge about how messy their students' work is. Meanwhile, their students wonder why they've lost points on homework and tests.

The equation is useful when we know: one point on the line: (x 1,y 1); and the slope of the line: m.; and want to find other points on the line. Have a play with it first (move the point, try different slopes):

[Brightstorm - Easy Help, Fun Teachers](#)

So let's start with a pretty straightforward function. Let's say f of x is equal to 2x plus 4. And so if I take f of 2, f of 2 is going to be equal to 2 times 2 plus 4, which is 4 plus 4, which is 8. I could take f of 3, which is 2 times 3 plus 4, which is equal to 10. 6 plus 4. So let's think about it in a little bit more of an abstract sense.

Writing Algebra Equations Finding the Equation of a Line Given Two Points. We have written the equation of a line in slope intercept form and standard form. We have also written the equation of a line when given slope and a point. Now we are going to take it one step further and write the equation of a line when we are only given two points that are on that line.
